

EarthCam Upgrade for Control Center 8

February 19, 2022

An upgrade for Control Center 8, a [software-as-a-service](#) (SaaS) for visual collaboration, is now available to all EarthCam clients.

An AI Media Dashboard simplifies the complex task of organizing, navigating, analyzing, and sharing imagery and data in relation to construction projects. The dashboard creates a destination for information to be automatically uploaded and shared to a centralized, secure, asset database which places all visual information at stakeholders' fingertips. Data extracted from imagery is presented in 4D visualizations drawing from millions of data-points to give a new level of insight and search ability, helping owners, contractors, and clients to drive productivity, the company says. Control Center platform, (version 8.8) includes 70+ upgrades.
